Yield & Income Factors: Base Moisture = 15.0% Shrink = 1.3 Drying = \$0.025 Prices: GMO = \$3.25; non-GMO = \$3.25

Test Comments: April snow and May rain delayed planting. Conditions were good at planting. This site received 60" of rain May 1 through October 1. Plants were shorter than at other sites, and stalk lodging was reduced. The early-season test was on slightly higher slope than the full-season test. Yields here reflect what Leon saw across his fields, large yield variations from soils that were saturated all summer.

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
