### TEST COMMENTS:

There was plenty of heat but not a lot of rain in this part of Ida county. Except for a storm that brought a little over 1" on May 30, conditions were quite dry from planting through all of June. July showers returned to provide nearly 3.6" of precipitation. The rain that arrived 7-10 days before pollination was a huge help but hardly filled in the cracks. August turned dry again, but some nice showers during the last half of the month were well-timed during grain fill. Not much was noted here for lodging. Plants stood well and ear retention was good at the time of harvest.
