### TEST COMMENTS:

Most of Sioux County has remained in a moderate drought for the entire season, however, rainfall has been timely on this farm. With the exception of a large storm that dumped 6.5" on Aug 6, showers through the remainder of the season were small but just enough to allow the plants to form large ears and deep kernels. July was cool and dry which likely reduced foliar disease development during reproductive stages. Chris did not notice excessive pressure of any kind. Corn was standing well at harvest with very little lodging observed.
