### TEST COMMENTS:

*This plot was the first that we planted this year. Planting conditions were near perfect for late April. Then the rains came. During stand counts the corn looked pretty tough but did come out of it pretty well. The corn was standing well at harvest and was dry. There were a few spots of weed escapes in the plot, and a low spot in the ultra-early test that was affected by saturated soils. We want to thank Brian for hosting. The ultra-early test was rejected due to yield variability with no significant differences among the hybrids.*
