#### SECTION 12: ECOLOGICAL INFORMATION

This product is non-toxic or practically nontoxic (Category 4) to mammalian wildlife, beneficial insects and mites,.

Avian Acute Oral Toxicity: Bobwhite quail. LD<sub>50</sub> >2000 mg/kg-bw. Non-toxic.

Toxicity to freshwater aquatic life: Rainbow trout (96-hour acute toxicity) EC<sub>50</sub> > 1000 mg/L AI. Minimally toxic  
*Daphnia magna* (48-hour acute toxicity) EC<sub>50</sub> = 28.8 mg/L.  
Unicellular green algae (72-hour growth inhibition) NOEC 1000 mg/L  
Category Acute 3

Bees and beneficial insects: Honey bee (48-hour contact and oral acute toxicity) LD<sub>50</sub> > 100 µg a.s./bee. Non-toxic.

To minimize potential exposure to bees and other pollinating insects, do not apply while bees are foraging. Do not allow product to drift to blooming crops or weeds if bees are foraging. Minimize spray drift away from the target area to reduce effects to other non-target insects.

BioST Nematicide has been evaluated for toxicity to non-target insects in a variety of bioassays and on a variety of crops under various normal growing conditions. However, testing all beneficial insects, in all situations, mixtures

and combinations, is not feasible. Prior to treating entire crop where the release of beneficial insects serve as part of an Integrated Pest Management (IPM) program, consult with an extension specialist, a pest control advisor (PCA) or with the product manufacturer.

**For terrestrial uses only:** Do not apply directly to water, or to areas where surface water is present, or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment wash water or rinsate.

**Sensitive areas:** The pesticide should only be applied when the potential for drift to adjacent sensitive areas (e.g. residential areas, bodies of water, known habitat for threatened or endangered species, non-target crops) is minimal (e.g. when wind is blowing away from the sensitive areas). Do not allow spray to drift from the application site and contact people, structures people occupy at any time and the associated property, parks and recreation areas, non-target crops, aquatic and wetland areas, woodlands, pastures, rangelands, or animals. Do not allow product to drift to blooming crops or weeds if bees are foraging. Minimize spray drift away from the target area to reduce effects to other non-target insects
