#= Missing Entry from Clarksville

All the yield data and test weights are reported at the 13.5% grain moisture content

Bold values indicate no significant difference from top ranked entry

Barley trials at Beltsville faced some damage due to biotic and abiotic stresses.

^ Data for these two lines were not recorded due to germination issues and damages due to birds

All the yield data and test weights are reported at the 13.5% grain moisture content

Bold values indicate no significant difference from top ranked entry
