HARVESTED - STAND:	Oct 26 34.0 /A
PEST & DISEASE RISK:	Goss Wilt, Fusarium*

TEST COMMENTS:

This strip-tilled plot saw impeccable emergence and then just never dried out, receiving 15" more than the normal season rainfall. At harvest, plants stood exceptionally well with little to no lodging seen. Weeds were well controlled, and plants were healthy. Both from visual review and the hard yield numbers, it was obvious that the full-season test was going to lead the pack. It did not disappoint.
