TEST COMMENTS:

This plot was planted into rather dry conditions, but that was the last dryness it saw. Rains came strong and steady throughout the season, resulting in over 8" of above-normal precipitation. The rains did not slow down into the harvest season, as October and the first days of November saw almost another 7". These late rains delayed harvest and resulted in higher-than-expected stalk lodging across the plot. The weeds were well controlled, and very little disease pressure was seen.
